

Status Report

06-25-10

528 U.S. Fish and Wildlife personnel are actively responding to the Deepwater BP Oil Spill.

Clean-up crews are working in Barataria Bay in Louisiana. A leaking wellhead was found on the Gulf side of East Timbalier Island in Louisiana. Crews are deploying hard boom at the mouth of Pass A Loutre, LA.

Hand crews and excavators continue to remove oil on the Perdue Unit of the Bon Secour National Wildlife Refuge in Alabama.

St. Vincent National Wildlife Refuge in Florida reports booms are in place at Indian Pass. Due to strong current, booms must be repositioned each morning.

Birds will be moved from the facility in Ft. Jackson, LA to Covington, LA. The move is scheduled for some time in mid to late July.

The Mobile Command Center continues to need more teams to maintain a one-hour response time for the entire spill area.

Aerial missions are planned over Barataria Bay, Timbalier and Terrebonne Bay, South West Pass and Chandaleur Islands, Biloxi Marsh and Breton Sound.

By the numbers

Personnel Involved

Overall personnel responding approximately 37,000

Response Vessels

Total vessels responding: more than 6,200

Boom Data

Total boom deployed: more than 1,295 miles

Boom available: 589 miles

Oily water recovered: approximately 25.6 million gallons

Amount estimated burned: more than 10 million gallons

Oil captured over last 24 hours: more than 708,372 gallons

Dispersants

Surface dispersant used: 977,000 gallons

Subsea dispersant used: 502,000 gallons

Total dispersant used: approximately 1.48 million

Shoreline impacted

Shoreline impacted over last 24 hours: approximately 179 miles of Gulf Coast shoreline is currently oiled—approximately 34 miles in Louisiana, 42 miles in Mississippi, 42 miles in Alabama, and 61 miles in Florida.
